

Figure 11: Sanders (#berniesanders #feelthebern) Twitter network looking at communication between from- to to-users. Each color represents a different community with node size labels based on relative magnitude of in-degree measurement. Some communities to highlight: the @berniesanders network is in purple, @hillaryclinton in blue, and @bkforbernie in bright pink, and @susansarandon is in dark grey. Importantly, @jordanchariton's community is in green. Chariton had the most retweeted tweet, which was detailed information how to vote with an emergency provisional ballot.
